HEARING INSTRUMENT FOR ACTIVE TYPES

If you swim, play tennis, or participate in other outdoor activities, you will want a hearing instrument that can keep up with your active lifestyle. To meet this challenge, there is a hearing instrument with a robust design that is waterproof, dustproof, and shockproof. This exceptionally sturdy instrument has a completely sealed housing and battery door that lock out moisture and safeguard against corrosion. The microphone is covered with a membrane that protects against dust and moisture and reduces wind noise. This means that wearers can enjoy hearing with exceptional clarity and comfort while building sand castles at the beach and swimming in the surf. This active-lifestyle hearing instrument is also great for active children and teens.

TIP OF THE WEEK

If you are a person who is vain and are concerned with how the hearing instruments are going to look, the receiver in the canal option is a viable one as well as the completely in the canal style.

P.S. Many hearing instruments have wireless capability that enables them to connect with cell phones, MP3 players, and other devices.
